

## Constant Voltage 48W DALI+PUSH LED Driver Series

#### ■ Features :

- · Constant Voltage mode output with multiple levels selectable by dip switch
- · Emergency lighting application is available according to IEC61347-2-13
- · Built-in active PFC function and class II design
- · Standby power consumption <0.5W
- Functions: DALI interface(logarithm or linear dimming curve selectable), push dimming synchronization up to 10units
- .3 years warranty

### ■ Applications :

- LED indoor lighting
- ·LED office lighting
- ·LED commercial lighting
- LED panel lighting
- Industrial lighting

### ■ Description:

GRT-DCV48-DA series is a 48W AC/DC constant current mode output LED driver featuring the multiple levels selectable by dip switch and the DALI interface with the compliance to IEC62386. GRT-DCV48-DA operates from 100~240VAC and offers different output voltage levels ranging between 12V and 48V. Thanks to the efficiency up to 86%, with the fanless design, the entire series is able to operate for -30'C ~+85'C case temperature under free air convection. In addition, GRT-DCV48-DA is equipped with push dimming and synchronization functions, so as to provide the optimal design flexibility for LED lighting system.

# Power your innovation ■ Specification

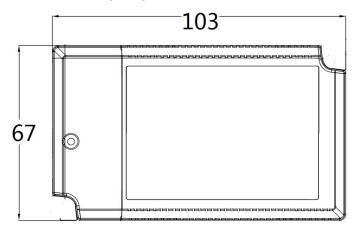

DC VOLTAGE RANGE	MODEL		GRT-DCV48-DA

### Notes:

- 1. All parameters NOT specially mentioned are measured at 230VAC input, rated current and 25"C of ambient temperature.
- 2. De-rating may be needed under low input voltages. Please refer to "STATIC CHARACTERISTIC" sections for details.
- 3. Length of set up time is measured at first cold start. Turning ON/OFF the driver may lead to increase of the set up time.
- 4. Efficiency is measured at 500mA/50V output set by DIP switch.
- 5. Standby power consumption is measured at 230VAC.

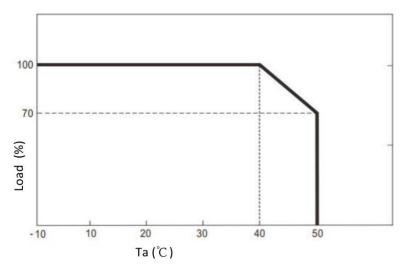

- 6. The driver is considered as a component that will be operated in combination with final equipment. Since EMC performance will be affected by the complete installation, the final equipment manufacturers must re-qualify EMC Directive on the complete installation again.
- 7. The ambient temperature derating of 3.5C/1000m with fanless models and of 5'C/1000m with fan models for operating altitude higher than 2000m(6500ft).
- 8. Based on IEC 62386-101/102 DALI power on timing and interruption regulations, the set up time needs to test with a DALI controller which can support for DALI power on function, otherwise the set up time will be higher than 0.5 second for DA2-type.
- 9. To fulfill requirements of the latest ErP regulation for lighting fixtures, this LED power supply can only be used behind a switch without permanently connected to the mains.
